First Impression

Y05-U22-xxx (xxx: Cable Length) looks like just a USB-microUSB cable, but supporting three functions in a small cable;

1. **USB2.0-microSDXC Reader for PC,**
2. **USB2.0 OTG-microSDXC Reader for smart phone,** (*SDXC available only when supported by Smart phone)
3. **USB2.0-Link/ Power Charge Cable between PC and Smart Phone.**

A single cable works as not only using USB-microUSB cable between PC and smart phone, but also the cable itself will be microSD card reader for both PC and smart phone.
